

Energy Management for Motor Driven Systems

Course Number: EN-02-300

PDH: 15

Approved for: AK, AL, AR, FL, GA, IA, IL, IN, KS, KY, LA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, SC, SD, TN, TX, UT, VA, VT, WI, WV, and WY

State Board Approvals

Florida Provider # 0009553 License #868

Indiana Continuing Education Provider #CE21800088

Maryland Approved Provider of Continuing Professional Competency

New Jersey Professional Competency Approval #24GP00025600

North Carolina Approved Sponsor #S-0695

NYSED Sponsor #274

Course Author: Mathew Holstrom

How Our Written Courses Work

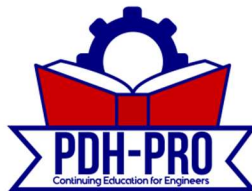

This document is the course text. You may review this material at your leisure before or after you purchase the course.

After the course has been purchased, review the technical material and then complete the quiz at your convenience.

A Certificate of Completion is available once you pass the exam (70% or greater).

If a passing grade is not obtained, you may take the quiz as many times as necessary until a passing grade is obtained).

If you have any questions or technical difficulties, please call (508) 298-4787 or email us at admin@PDH Pro.com.

Contents

Chapter 1	Energy Management for Motor-Driven Systems.....	1
Elements of a Successful Energy Management Program.....		2
1. Secure Top Management Commitment		2
2. Appoint an Energy Coordinator.....		2
3. Obtain Employee Cooperation.....		3
4. Conduct Energy Surveys.....		3
5. Organize Energy Data.....		4
6. Analyze Survey Results.....		5
7. Set Conservation Goals		5
8. Develop Organization-Wide Energy Management Plan.....		5
9. Implement Engineering Changes		5
10. Monitor and Evaluate Results.....		7
Conclusion		7
Chapter 2	Understanding Your Utility Bill	9
Organizing Utility Bills and Production Data		9
Interpreting Utility Charges.....		12
Service Charge.....		13
Energy Charge		13
Demand Charge.....		14
Power Factor Charges.....		16
Optional Rate Schedules.....		17
Time-of-Use Rates		17
Interruptible, Curtailment and Customer Generator Rates.....		17
Using Billing Data to Identify Opportunities.....		18
Checklist for Electricity Cost Savings.....		19
Chapter 3	Industrial Electrical Systems.....	21
The Plant Electrical Distribution System.....		21
Over and Under Voltage		22
Voltage Unbalance.....		23
Troubleshooting and Tuning your In-Plant Distribution System.....		24
Troubleshooting Poor Contacts.....		25
Voltage Drop Survey.....		26
Infrared Thermography		26
Troubleshooting Voltage Unbalance.....		27
Troubleshooting Over and Under Voltage.....		28
Troubleshooting Low Power Factor.....		29
Troubleshooting Undersized Conductors.....		29
Troubleshooting Insulation Leakage		29

Chapter 4 Taking Field Measurements.....	31
Safety Considerations	31
Constructing the Motor List and Inventory Database.....	32
Acquiring Motor Nameplate Data	32
Load-Time Profiles	33
Measuring Operating Values.....	34
Data Gathering Approaches	35
Safety Issues in Data Gathering.....	36
Voltage Measurements	36
Current Measurements.....	37
Power Factor Measurements.....	37
Purchasing Motor Testing Instruments	38
Voltage Meters	38
Current Meters.....	38
Tachometers.....	39
Power and Power Factor Meters	40
Multi-channel Power Loggers	41
Motor Analyzers.....	41
Industrial Practices	42
Chapter 5 Motor Load and Efficiency Estimation Techniques.....	45
Input Power Measurements	45
Line Current Measurements	46
The Slip Method.....	47
Variable Load Levels.....	49
Determining Motor Efficiency	50
Computerized Load and Efficiency Estimation Techniques.....	52
Chapter 6 Energy, Demand, and Dollar Savings Analysis.....	55
Calculating Annual Energy and Demand Savings	55
Assessing Economic Feasibility.....	56
Chapter 7 Motor Improvement Planning	61
Energy Efficient Alternatives	61
Upon Failure Alternatives.....	62
Without an Existing Motor Failure	65
<i>MotorMaster+</i> : Motor Energy Management Software.....	62
Motor Resizing.....	65
Conclusion.....	70

Chapter 8 Power Factor Correction.....	73
The Concept of Power Factor.....	73
Power Factor Penalties	74
Power Factor Improvement.....	75
Sizing and Locating Power Factor Correction Capacitors.....	76
Sizing Capacitors for Individual Motor and Entire Plant Loads	78
Benefits of Power Factor Correction.....	80
Additional Benefits of Power Factor Correction.....	82
Power Factor Correction Costs.....	83
Avoiding Harmonic Resonances When Installing Capacitors	84
Chapter 9 Preventative and Predictive Maintenance Planning	87
Cleaning.....	88
Lubrication.....	89
Mountings, Couplings, and Alignment.....	91
Operating Conditions	92
Thermal, Vibration and Acoustic Tests.....	95
Electrical Tests.....	96
Storage and Transport.....	97
Appendixes	101
Appendix A: Motor Nameplate and Field Test Data Form	101
Appendix B: Average Efficiencies for Standard and Energy Efficient Motors at Various Load Points	103
Appendix C: Motor Energy Savings Calculation Form	105
Appendix D: Power Factor Correction Capacitor Suppliers	107

Figures and Tables

Figures

- 1-1 Typical Energy Management Team Organization Chart
- 1-2 Steps in an Energy Management Program
- 2-1 Energy Use Profile Reports
- 2-2 Sawmill Energy Consumption Disaggregation
- 2-3 Billing Statement
- 2-4 Electric Demand Meters
- 3-1 Typical Facility Single-Line Diagram
- 3-2 Acceptable Voltage Range for Systems and Motors
- 3-3 Motor Voltage Unbalance Derating Curve
- 3-4 Effects of Voltage Unbalance on Motor Losses
- 4-1 Motor Nameplate
- 4-2 Industrial Three Phase Circuit
- 4-3 Instrument Connection Locations
- 5-1 Relationships Between Power, Current, Power Factor and Motor Load
- 5-2 Depiction of Motor Losses
- 7-1 Motor Performance at Part-Load
- 7-2 Motor Efficiency Improvement Action Plan
- 8-1 The “Power Triangle”
- 8-2 Power Factor as a Function of Motor Load
- 8-3 Locating Capacitors on Motor Circuits
- 8-4 Apparent Power Requirements Before and After Adding Power Factor Correction Capacitors
- 9-1 Effect of Voltage Variation on Induction Motor Performance Characteristics
